EDUCATION

Master of Science, Software Engineering
San Jose State University

Anticipated May 2021 | San Jose, CA

Bachelor of Technology, Information and Communication Technology
Dhirubhai Ambani Institute of Information and Communication Technology (DA-IICT)

Aug 2014 – May 2018 | India

EXPERIENCE

Software Engineer Intern at Evolko, Inc.

June 2020 – Present | San Jose, CA

- Leading the frontend engineering team of one of the prime products of Evolko.
- Responsibilities include developing client-side web application using **React** and the client-side mobile application using **React Native**.
- The product, having **thousands** as userbase, is a novel application connecting doctors and hospitals with patients, thereby changing the healthcare spectrum in the post **COVID-19** world.

Graduate Research Assistant at San Jose State University

May 2020 – Present | San Jose, CA

- Working with Professor Magdalini Eirinaki for domain classification and prediction using Machine Learning methodologies.
- Generation of dataset using web scraping, data processing using pandas, domain classification using Machine Learning.

Software Development Engineer at Deloitte

June 2018 – Feb 2019 | Mumbai, India

- Improved the batch execution performance by **40%** by converting internal batches from a complex legacy structure to a simple framework.
- Redesigned the implementation of multiple batch projects based on **Java** and **Python** with **MySQL** database.
- Developed core features like dynamic notifications of batch logs, encryption of sensitive batch information.

Research Assistant at Cyber Security Research Group, DA-IICT

Jan 2017 – June 2018 | India

- Developed a **Python**-based **Android** application: *MalDetec*. Wrote a research paper based on the same which got [published by Springer](#).
- *MalDetec*, a personal research project, is a non-root approach for dynamic malware detection in Android.
- Became the **youngest author** to get the paper accepted at ICISS 2017. Received an **IEEE award** for the publication.

PROJECTS

CartShare, A Sharing Pooling Service ([Live application](#), Dockerized and hosted on AWS)

Spring 2020

- Developed a scalable sharing pooling system using **React**, **Spring Boot** and **MySQL** to combat the spread of **COVID-19**.
- The neighbors can pool their orders and one pooler shops from the store, thereby promoting social distancing.

Umbrella, A Testing Service Platform ([Live application](#), Dockerized and hosted on AWS)

Fall 2019 – Spring 2020

- Developed a full stack testing service platform using **React**, **NodeJS**, **ExpressJS**, and **MongoDB**
- Testing Engineers and Managers can share projects, manage subscriptions, make and review submissions, locate the team.

GrubHub Clone

Fall 2019

- Developed a 3-tier **distributed** food ordering web application which simulates GrubHub using **ReactJS**, **NodeJS**, **MongoDB**.
- Implemented messaging queues using **Kafka**, deployed on **AWS EC2**.

Twitter Clone

Fall 2019

- Developed a 3-tier **scalable** social networking web application using the **MERN stack** which simulates Twitter.
- Implemented messaging queues using **Kafka**, used **AWS Auto Scaling** and **Load Balancer** over multiple **EC2** instances.

Portfolio Maker ([Live application](#))

Summer 2020

- Developed an **open source** React based web application for software developers to create their own portfolio websites.
- The app fetches user details using 3rd party APIs (like GitHub) and generates a feature-rich and ready-to-host portfolio specific to the user.

TECHNICAL SKILLS

Programming Languages Java, JavaScript, Python, SQL

Framework/ Technologies React, React Native, Redux, Bootstrap, NodeJS, ExpressJS, Spring Boot, GraphQL, Kafka, MongoDB, MySQL

Platforms Cloud- AWS EC2, Load Balancer, Auto Scaling; Containers- Docker; Version Control- Git, SVN

LEADERSHIP, ACHIEVEMENTS AND HOBBIES

- **Vice Convenor**, Microsoft Students' Technical Club, DA-IICT.
- Recipient of an **IEEE Scholarship** by the IEEE Gujarat state chairman for excellence in undergraduate research work.
- **Selected by Facebook** to participate in the FB San Francisco Hackathon (Nov 2019), were one of the few teams to complete the project.
- One of the **first-round finalists** in the Opportunity Hack '19 at PayPal HQ. Developed a mentor-mentee pairing application within 30hrs.
- *Hobbies*: Streak coding, writing English poems and short stories.
